

WLTxxx-xx, WLSxxx-xx, WLFxxx-xx, WLRxxx-xx

These continuous red light emissive modules are composed of a LASER diode, an electronic driver and a collimation optic system, all packaged in an aluminum case. Each device features an anti-reflex treated high quality glass lens, assuring a good collimation and a limited diffraction. Output power is stabilized over the entire temperature range.

Special features like diaphragm, fixed or adjustable focus, line generator, external power adjustment or 3V power supply are available on request.

See also the modulated output red LASER modules WLx xxx-xx MO.

Features

- High quality LASER diode
- High quality glass lens
- Stabilised output power
- Reverse power supply protection

Applications

- Smoke detection
- Particles detection
- Distance measurement
- Protection areas
- Barcode readers
- Alignment systems
- Security systems

Electrical connections

+5V red Power supply, connected to case.
GND black Ground.

⚠ +5V connected to case.

Technical specifications

Supply voltage	+5V±10% / 50 mA max.
Output power[†]	1 ÷ 15 mW
Wavelength[†]	635 ÷ 670 nm
Beam[†]	collimated, 4x2 mm
Divergence	0,4 mrad max.
Boresight	5 mrad typical
Temperature	-10 ÷ 50°C (60°C)
Weight	WLS - 13g, WLT - 6g, WLF - 8g, WLR - 3g
